THE UNIVERSITY GUIDE

This little book is published to give in brief compass information about the several departments of the University of Cincinnati. A separate announcement of each college and school has been issued, and will be sent upon application to the Secretary, University of Cincinnati, Cincinnati, Ohio.

The University of Cincinnati is situated on the heights above the city of Cincinnati, and is surrounded by the wooded hills and dales of Burnet Woods Park. Its site is at once artistic and

SITUATION practical. Near one of the great railway centers of the country, its location on the hilltop removes it from the din and bustle of the city, and ensures the tranquillity necessary for intellectual pursuits. The great extent of Burnet Woods provides an unrivalled campus, with golf links, a lake for boating and skating, and many shady paths and nooks beautiful in spring and autumn.

The city itself offers superior cultural advantages. Cincinnati takes high rank among the cities of America for her taste in music and in art. The schools of music are of the best, and the recitals of the Orpheus Club and the Symphony Orchestra, together with the May Festival, afford musical training of a high order. The Cincinnati Art Academy (affiliated with the University) gives instruction in drawing, painting,

modeling and carving. The Art Museum and the Rookwood Pottery are themselves important elements in education.

The academic department of the University, in its equipment and teaching force, offers every facility for higher education. Its faculty has been selected from the leading universities of the country and numbers more than forty teachers. Its de-

COLLEGE OF LIBERAL ARTS departments of Astronomy, Biblical Literature, Biology, Chemistry, Economics, English, German, Greek, History, Latin, Mathematics, Philosophy, Physics, Psychology and Romance Languages, present a great variety of excellent courses. The course of study is based on a system of election modified by certain requirements in English, Science, Philosophy, and Language.

The laboratories of the scientific departments are equipped with everything needful for complete study and investigation in the subjects
LABORATORIES of Biology, Physics, and Chemistry. A large building is devoted wholly to Chemistry; Biology and Physics share the newly erected Cunningham Hall.

A beautiful grey stone building, a few yards distant from the main group, contains the book collections of the University, 45,000 volumes and 7,500 pamphlets. The Periodical Room contains the current numbers of 300 periodicals. The reference library
LIBRARY numbers 2,000 volumes; the Library of the American Association for the Advancement of Science consists of 5,600 volumes. The

Library of the Historical and Philosophical Society of Ohio, 20,000 volumes and 64,000 pamphlets, rich in local Americana is located in the Van Wormer Library. The annual addition to the University library is 8,000 volumes. Other library collections in the city are important and available.

The Cincinnati Observatory, the astronomical department of the University, is situated on a high point of land in the eastern part of the

CINCINNATI OBSERVATORY city. The grounds comprise four acres. The main building, surmounted by a thirty-foot dome, houses a new equatorial by Alvan Clark & Sons. The Observatory is completely equipped for instruction and for scientific work.

The University now offers the advanced degrees of Master of Arts and Doctor of Philosophy. Its equipment in material for original investigation in the several departments justifies

GRADUATE SCHOOL this extension of academic work. The Graduate School has its separate faculty and regulations, and information concerning it may be obtained from the *Announcement of the Graduate School*, published separately.

The College for Teachers is the latest addition to the departments of the University. This College has

COLLEGE FOR TEACHERS its dean and faculty, and offers general and professional courses for those who look forward to the career of teacher in its higher phases. The announcement of the College for Teach-

ers may be obtained from the Secretary; the Dean of the College will be glad to answer all special inquiries.

The College of Engineering occupies a part of Hanna Hall, until a separate building can be provided for its increasing demands. It offers courses in Civil,

COLLEGE OF ENGINEERING Mechanical, Electrical and Chemical Engineering. This College has its dean and faculty apart from the College of Liberal Arts, and its equipment is being rapidly extended. Cincinnati, with its situation in the heart of the manufacturing district of the United States, itself a leading center of industry, is admirably adapted for the needs of practical instruction. The College of Engineering publishes a separate Announcement which will be sent on application to the Secretary.

The University possesses a complete printing office, where work is done for the departments. It also issues three series of periodical publications: the *Record*, (semi-monthly); the *Studies*, (bi-monthly); and the *Teachers' Bulletin*, (monthly). The *Weekly News*, a student publication, is also printed here. *A list of the scientific publications of the University (1900-1905) will be sent on application.*

Athletics are a notable feature of University life in Cincinnati. The foot-ball, base-ball, and basket-ball teams are rapidly coming to the front rank under the supervision of the Coach and the Graduate Manager. Physical training for girls is also under the direction of

an Instructor in Physical Training and is required of Freshmen and Sophomores.

The choral music of the University is in charge of the director of the Orpheus Club, for many years chorus director of the Cincinnati May Festival. Glee Clubs and Choruses meet with him for training twice a week.

The various forms of student activity are represented in numerous student societies: the Forum, a debating society, and class debating clubs; the Young Women's Literary and Debating Society; the Chemists' Club; the Engineers' Club; the French Club; the Deutscher Verein; the Comedy Club; Glee and Mandolin Clubs; the Blue Hydra, a biological club, with membership based on scholarship; Y. M. C. A. and Y. W. C. A.; the University Settlement, a flourishing organization. The University Club unites the various organizations. Fraternities and sororities are well represented. Public lectures are frequently given by members of the faculty and by visiting scholars.

The Technical School of Cincinnati was in 1901 transferred to the Board of Directors of the University of Cincinnati, and new buildings were erected for it adjacent to the University buildings.

TECHNICAL SCHOOL The School affords a four years' manual training high school course. Forges, machine-shops, and wood-shops are equipped with everything necessary for the students' use. The leading Colleges and Universities admit graduates of the Technical School without examination. For announcement and other information address the Principal of the Technical School, University of Cincinnati.

The College of Medicine is located on the hillside, between the University buildings in Burnet Woods and the city proper. Since its organization in 1819, as the Medical College of Ohio, (since 1896 Medical Department of University of Cincinnati) this institution has held its place among the foremost medical colleges of the country. Its teaching staff of fifty members includes some of the leading physicians of the Middle West.

The new and beautiful building of the College of Law, (Cincinnati Law School) is located in the center of the city proper, near the offices of the legal quarter. The College is substantially endowed and has a law library of 7,500 volumes. The course of study follows the precedents of the oldest and best schools of the country. The standard is high, and the College numbers on the rolls of its graduates many of the most brilliant members of the legal fraternity of the Middle West.

The following official publications will be sent on application:

*The Catalogue of the University of Cincinnati,
The Announcement of the Graduate School,
The Announcement of the College of Liberal Arts.
The Announcement of the College for Teachers.
The Announcement of the College of Engineering.
The Announcement of the College of Medicine.
The Announcement of the College of Law.
The Catalogue of the Technical School.*

Address, The Secretary,
